CUSTOMIZATION PROJECTS

We have rich experiences in custom projects not only input devices but also other aluminum cases via CNC machines. We will study and work from top to bottom. To accomplish as many requirements as possible by utilizing our current technology and partnered up with contracted suppliers like raw materials, molds..etc. Support retrofitting from our standard products or design and rebuild a brand new one. Just let us know your application and needs, and we'll do the rest then.

Process:

- Communication and discussion about specific requirements
- Turns into concept
- Apply concept into 2D/3D drawing
- 3D printing the first sample
- Run tests
- Start production upon confirmation on sample(s)
- Completed

Can be integrated with the following elements:

- Materials for the device including keys, plates or case
- Function keys from F1-F12 or F1-F24
- Individual numeric typing part
- Keyboard layout customizable
- Mouse ranging from touchpad, trackball, force sensing resistor, etc
- Mounting solution from movable desk top, panel mounted
- Cables and interfaces
