

GUIDE

Use an alcohol-based disinfectant in line with the manufacturer's specifications, apply a small amount of it and then using a soft cloth to clean the keyboard with circular movements. After only a minute of cleaning you will see your keyboard come back to it's original clarity.

Press these two keys together to turn off the keyboard during cleaning process, it is not necessary to unplug the keyboard from PC.

ATTENTION: Do not use the following Agents, abrasive cleansers, steel wool, scouring pads, or sharp or pointed objects to clean the keyboard, as these will damage its exterior.

- Methyl Benzene
- 1,4-xylene
- Gasoline
- Kerosene
- Isopropanol
- Methyl-ethyl-ketone
- Cellulose Thinner
- Thinning Agent
